

BOHDAN FEDOROV

Senior Full-Stack Developer • AI Integration • Tech Lead

Remote-first, based in Ho Chi Minh City, Vietnam (open to relocation) • bogdanfedorov@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 6+ years of experience delivering and scaling production web applications across backend, frontend, cloud infrastructure, DevOps, and AI-powered engineering workflows. Owns the complete product lifecycle — from requirements gathering and solution design through implementation, deployment, and production support. Delivered products serving 5,000+ users, improved database query performance by 4x, and led engineering teams of up to five developers. Strong communicator with hands-on experience working directly with clients in the US, Israel, and Poland.

AI CAPABILITY

LLM Integration: OpenAI API, Anthropic Claude, LLM deployment, prompt engineering, function calling

RAG & Pipelines: RAG systems, ChromaDB vector search, MCP-based AI assistant with tool use (Google Calendar, external APIs)

AI-Powered Products: AI voicemail & scheduling platform (VAPI), AI book-editing platform (text analysis + Stable Diffusion cover generation), AI crypto-market consultant

AI Workflow Automation: Automated tasks across BA, PM, Dev Review, and QA cycles, reducing manual overhead at each stage of the SDLC

TECHNICAL SKILLS

Backend: Node.js, TypeScript, NestJS, Express, Fastify, GraphQL, Go, RabbitMQ

Frontend: React.js, Next.js, Tailwind CSS, Redux, Vue, HTML, CSS, Web Components

DevOps / Cloud: Docker, Kubernetes (EKS, Helm, GitOps), AWS, CI/CD, GitHub Actions

Databases: PostgreSQL, MongoDB, Redis, Elasticsearch, ChromaDB, TypeORM

AI / ML: OpenAI API, Anthropic Claude, Prompt Engineering, Stable Diffusion, RAG, VAPI, MCP

Testing & Tooling: Playwright, Jest, Postman

Leadership: Team Lead (up to 5 developers), Agile/Scrum, Mentoring, Stakeholder & Client Communication

WORK EXPERIENCE

Tech Lead, Full-Stack Developer — Voopty

Aug 2025 – May 2026

Remote

- Architected and delivered an ERP/CRM platform for the education sector end-to-end — from requirements and system design through implementation, deployment, and ongoing production operation — establishing the technical foundation the product runs on today
- Built and led a cross-functional engineering team of 3–5 developers, owning the full people-and-process loop: hiring and onboarding, sprint planning, code-review standards, and direct communication with business stakeholders
- Designed and rolled out an AI-driven automation layer spanning the full SDLC — business analysis, project management, dev review, and QA — reducing manual coordination overhead at every stage of the delivery pipeline
- Owned the cloud infrastructure end-to-end: provisioned and operated a Kubernetes cluster on AWS EKS, backed by a Docker-based CI/CD pipeline through GitHub Actions for repeatable, automated releases

Stack: Node.js, React, Next.js, MongoDB, Redis, Kubernetes, GitHub Actions, Jira automation

Senior Full-Stack Developer • Contract — AI Scheduling & Voicemail Platform

Apr 2025 – Aug 2025

Chicago, USA • Remote

- Delivered a full-cycle AI-powered voicemail and scheduling platform for a US client end-to-end, owning backend services, frontend UI, and cloud infrastructure as the sole full-stack engineer on the engagement
- Profiled and re-engineered the platform's critical PostgreSQL queries, cutting execution time by 4x and clearing a key performance bottleneck ahead of client launch
- Engineered the platform's AI/voice layer: integrated VAPI for conversational voice AI, wired up the Google Calendar API for scheduling, and built an MCP-based AI assistant capable of invoking external tools on the user's behalf
- Acted as the direct technical point of contact for the US client, running requirements discussions and status updates in English throughout the engagement

Stack: Supabase, React, MCP, VAPI, Google Calendar API

Senior Backend Engineer • Contract — Football Analytics Platform

Oct 2024 – Feb 2025

Warsaw, Poland • Remote

- Designed a high-load, real-time microservices backend to stream live sports data to end users, built to sustain continuous concurrent traffic without degrading response times
- Engineered data pipelines combining Redis for hot-path caching with Elasticsearch for search and aggregation, bringing query response times down to sub-second levels under load
- Owned deployment and operations on Kubernetes, running a Docker-based CI/CD pipeline to keep releases frequent and low-risk

Stack: Node.js, Go, MongoDB, PostgreSQL, Redis, Elasticsearch, Nginx, Kubernetes

Team Lead, Full-Stack Developer • Contract — CRM Platform — Communications Sector

Feb 2024 – Jul 2024

Kyiv, Ukraine • Hybrid

- Took ownership of the CRM platform across its entire lifecycle — requirements gathering, system architecture, deployment, and post-release monitoring — acting as the single technical authority for the product
- Built the engineering team from the ground up: led hiring and onboarding, then managed day-to-day project execution as team lead
- Introduced Agile ceremonies and workflows, mentored junior developers on architecture and code quality, and served as the primary technical liaison with business stakeholders

Stack: Node.js, Next.js, MongoDB, PostgreSQL, Redis, Elasticsearch, Tailwind CSS

Middle Full-Stack Developer — AI-Powered Publishing Platform

Oct 2023 – Feb 2024

Tel Aviv, Israel • Remote

- Built an AI-powered book-editing platform combining automated text analysis with generative cover design, using Stable Diffusion to produce cover artwork directly from manuscript content
- Worked as the direct engineering point of contact for the Israeli client, communicating in English throughout the engagement to translate product requirements into technical implementation

Stack: Node.js, React.js, PostgreSQL, Stable Diffusion

Junior+ / Middle Full-Stack Developer — Lampa Software

Feb 2022 – Jul 2023

Vinnitsia, Ukraine • Office

- Built a digital platform for restaurant businesses covering online menu management, customer loyalty programs, and operational analytics
- Developed an internal CRM and time-tracking system modeled on Jira-style workflows, used for internal project and task management
- Advised on the design of an AI assistant for a crypto-market product, contributing to its conversational logic and market-data integration

Stack: Node.js, React.js, MongoDB, PostgreSQL, Tailwind CSS

Junior Backend Developer — Yalantis

Sep 2020 – Feb 2022

Kyiv, Ukraine • Office

- Developed backend services powering a US-based EV car-charging mobile app, supporting the charging-session and station-management flows used by end users
- Designed and documented RESTful APIs with Node.js and PostgreSQL, using Swagger to keep contracts clear for frontend and mobile consumers

Stack: Node.js, Express, PostgreSQL

Trainee Web Developer — Freelance

Sep 2019 – Sep 2020

Remote

- Delivered freelance web-development projects alongside coursework: building website layouts, customizing WordPress themes and plugins, and improving frontend performance and usability
- Shipped small-business websites and landing pages end-to-end, from client requirements through launch

Stack: HTML, CSS, JavaScript, WordPress

EDUCATION

College of Information Systems & Technologies: Computer Science — Kyiv, Ukraine (2015–2017)

University College of Enterprise and Administration: Information Technology — Lublin, Poland (2017–2020)

LANGUAGES
